

car crash weather

CAR CRASH WEATHER – RIDER

1 – LINE UP

Drums	Dzhevret	Back of stage
Bass	Michael	Stage mid-left
Guitar 1	Michael	Stage left
Guitar 2 / additional vocals	Marco	Stage mid-right
Keys / main vocals	Pius	Stage right

2 – SET LIST

Anything from 30 up to 75 minutes.

3 – MONITORING

Ideally, 5 in-ear systems with individual mixes are provided.
Please prioritize Pius' in-ear system in case 5 separated in-ear mixes are not possible.
If in-ear is not possible at all, please provide a 5-way monitoring system (5 wedges).

For smaller clubs:

Please try to have as much of the above-mentioned wedges or in-ear systems ready. We will be working with what is there; the more, the better.

For very small clubs:

We absolutely need one wedge for keyboard/vocals. All other instruments do not necessarily need to be monitored. We will be happy to play loudly at your spot in rehearsal room style.

4 – LIGHT SHOW

– important –

Please be aware that the use of strobe lights can cause epilepsy to one of the band members. Lights can vary and be fast, but please refrain from a paparazzi style light show. We are not that famous.

5 – CATERING

We don't have any special diets except for **one vegetarian menu**. There is absolutely no need to serve meat to the other members. Vegetarian or vegan menus are also highly appreciated. Please provide some water bottles on stage.

6 – CONTACT

Do not hesitate to contact us at info@carcrashweather.com

7 – PATCH LIST

Please provide enough power plugs on stage for amps, instruments, effects, PC, and samples.
